

VillageTaste Foods – Food Storage and Safety Guide

Introduction

Proper food storage is important for maintaining freshness, taste, and safety. This guide provides recommendations for storing traditional Indian food products supplied by VillageTaste Foods.

Following proper storage methods can increase shelf life and preserve product quality for longer durations.

Pickle Storage Guidelines

Pickles should always be stored in:

- airtight containers
- cool and dry places
- away from direct sunlight

Important Tips:

- Use a dry spoon while serving.
- Avoid moisture entering the container.
- Close the lid tightly after use.

Shelf Life:

Most pickles remain fresh for:

- 6 to 8 months under proper storage conditions.

Special Recommendation:

Oil-based pickles naturally last longer compared to water-based preparations.

Snack Storage Guidelines

Traditional snacks such as chakli, khakhra, sev, and mathri should be stored in airtight containers to maintain crispiness.

Avoid:

- humid environments
- exposure to air for long durations
- wet storage surfaces

Recommended Consumption Time:

Consume within:

- 30 to 45 days after opening.

Storage Tip:

If snacks lose crispiness, mild reheating may improve texture slightly.

Sweet Storage Instructions

Sweets prepared using ghee and dry fruits should be stored carefully.

Besan Ladoo

- Store in cool containers.
- Avoid excessive heat.
- Keep away from moisture.

Dry Fruit Barfi

- Refrigeration may improve shelf life during summer seasons.
- Consume within recommended expiry duration.

Coconut Ladoo

- Best stored in refrigerated conditions during hot weather.

Ready-to-Cook Product Storage

Khichdi mixes and spice blends should be kept:

- in sealed packets
- away from moisture
- in kitchen cabinets with stable temperature

Do Not:

- expose spice packets to direct sunlight
- store products near water sources

Spice Product Guidelines

Homemade spice powders such as garam masala and tea masala should be:

- stored in dry glass jars
- protected from humidity
- tightly sealed after use

Proper storage helps preserve aroma and flavor.

Signs of Product Spoilage

Customers should avoid consuming products if they notice:

- unusual odor
- fungal growth
- excessive oil separation
- color changes
- leakage in packaging
- abnormal texture changes

Delivery Safety Information

During transportation:

- products are packed using protective layers
- fragile containers receive extra cushioning
- leak-resistant packaging is used for liquid pickles

The company regularly checks packaging quality before shipment dispatch.

Seasonal Recommendations

Summer Season

- Store sweets in cooler areas.
- Avoid keeping snacks in direct sunlight.
- Refrigeration may help preserve some products.

Monsoon Season

- Protect products from humidity.
- Keep containers sealed tightly.
- Use moisture-free storage spaces.

Winter Season

- Jaggery products remain stable for longer periods.
- Some pickles may naturally thicken due to lower temperatures.

Travel Storage Tips

Customers carrying products during travel should:

- keep jars upright
- avoid excessive shaking
- protect products from direct heat inside vehicles

Food Safety Practices Followed by VillageTaste Foods

The company follows:

- regular kitchen cleaning
- ingredient quality checks
- small-batch preparation
- hygienic packaging methods

Employees are trained to maintain food handling safety standards.

Kitchen staff members regularly sanitize utensils and preparation surfaces to maintain hygiene quality.

Frequently Asked Questions

Can pickles be refrigerated?

Yes. Refrigeration can increase shelf life, especially during summer.

Why did my snack lose crispiness?

Exposure to moisture or air may reduce crispiness.

Can sweets be consumed after expiry date?

It is not recommended to consume products after the expiry date mentioned on packaging.

Are preservatives used?

Minimal preservatives are used only when required for product stability.

What should customers do if packaging is damaged?

Customers should immediately contact support services and avoid consuming products with damaged seals or leakage.
